

Not all systems are created equal.
Built for surgery. Designed for connection.

How Curevision Powers Telepresence

Built-In 4K Streaming

No external tools. No add-ons.

Curevision delivers native high-definition video streaming—secure, crisp, and smooth.

Perfect for guiding, teaching, or observing procedures in real-time.

Multi-Source Display in Sync

View everything in one interface.

Combine surgical camera, PACS, EMR, and vital signs—synchronized and customizable.

No source-switching. No delays.

Browser-Based, Secure Access

Connect instantly from anywhere.

With no software installation, remote participants can securely access the OR through encrypted browser links.

Live Audio & Interaction

Two-way audio. Real-time input.

Consultants can guide, comment, or annotate during surgery—just as if they were in the room.

Recording & Smart Tagging

Every moment is captured.

Automated, time-stamped recordings simplify post-operative review, education, and compliance.

Curevision's integrated telepresence is:

- Purpose-built for surgery
- Scalable across multiple ORs
- Seamless, secure, and vendor-neutral
